

REMARKS

Upon further review of the Specification, it was determined that the sequence appearing in the Specification on page 19, line 31 and assigned SEQ ID NO:26 in the Substitute Sequence Listing submitted June 11, 2007 was wholly encompassed by the nucleotides in SEQ ID NO:21. The first 19 nucleotides in this sequence are equivalent to SEQ ID NO:21 and the remaining portion of specified nucleotides is a reverse complement of SEQ ID NO:21. The amendments to paragraphs beginning on pages 19 and 30 amend sequence identifiers to reflect the deletion of this sequence and reassignment of SEQ ID NO:27 as SEQ ID NO:26.

Applicants request entry of this amendment in adherence with 37 C.F.R. §§1.821 to 1.825. This amendment is accompanied by a floppy disk containing the above named sequences, SEQ ID NOS:1-26, in computer readable form, and a paper copy of the sequence information which has been printed from the floppy disk.

The information contained in the computer readable disk was prepared through the use of the software program "FastSEQ" and is identical to that of the paper copy. This amendment contains no new matter.

If the Examiner believes a telephone conference would expedite prosecution of this application, please telephone the undersigned at 415-576-0200.

Respectfully submitted,

  
Kevin L. Bastian
